

## Summary of NVR & NA in VraagKracht – The Netherlands

**Written by: Wim Braamse**

In the southwest of Holland the teams of VraagKracht were asked to do increasingly more in-home family therapy treatments according to NA & NVR in 2014.

The family program was made available in two more regions in the southwest.

They also did a first group training for Foster Parents, that was well received. They were invited by the Foster Support group to continue that collaboration in 2015.

The VraagKracht teams trained several wards and teams doing in-home therapy in family's in Holland and Belgium.

They also advised and assisted city's to deal with safety and youth violence using NA and NVR. As a spin off this work, they gave workshops in primary and secondary schools and trained a group of social workers working in schools.

For more information see the [VraagKracht website](#).
