

Belgisch Instituut Geweldloos Verzet

Summary of NVR & NA work 2015 – Flanders

Written by: Frank Van Holen

- More and more institutions in youth care, health care, education, psychotherapy and psychiatry in Flanders are implementing NVR/NA in their work. The training programs in Flanders expand, both the domestic (e.g. BIGV, Leren over Leven, ...) and the foreign workshops (e.g. [New Authority Centre team](#) – Israel).
- In the autumn of 2015 the BIGV organized his second 5-day basic training in Watchful Care / New Authority / Nonviolent Resistance (see <http://bigv.be>). This training will be organized every year in autumn.
- In association with the BIGV a group of educational people is very active implementing NVR/NA in educational settings (see www.nagvopschool.be)
- Starting in the academic year 2015-2016, master students psychology (2nd master) of the Vrije Universiteit Brussel will be offered a basic training by Dr. Frank Van Holen and Prof. Dr. Johan Vanderfaellie (in association with the BIGV).
- At the last 'Flemish Conference for Child- and Youth Psychiatry and Psychotherapy' in September (17th and 18th) various contributions of BIGV-members focused on the implementation of NVR/NA in different contexts and on scientific research in this field (see: www.vckj2015.com).
